

ENVIRONMENTAL

Skar Precision Mouldings Ltd is committed to protecting the environment and improving its environmental performance through an effective Business Management System.

The Company is committed to continual improvement, compliance with our obligations and the achievement of intended environmental outcomes. To fulfil this commitment the Company will:

- Integrate environmental considerations into its business processes and decision making.
- Provide appropriate resources, support and leadership.
- Identify significant environmental aspects and set measurable objectives to improve environmental performance.
- Consider the full environmental life cycle of its products and services.
- Prevent pollution and protect the environment, including relevant factors such as ecological conditions, resource conservation and climate change where applicable.
- Manage and minimise waste through reduction, segregation, re-use and recycling feasible.
- Use energy, water, materials and natural resources efficiently and responsibly promoting long term sustainability.
- Ensure environmental criteria are considered in the procurement of goods and services
- Provide products and services its customers that reflect responsible environmental best practices.
- Engage with relevant interested parties to encourage improvements to the local and global environment.

Directors and Senior Management endorse this Policy Statement and ensures it is communicated, understood, implemented and maintained at all levels of the Company to meet the requirements of ISO 14001:2015

The Business Management System will be monitored, measured and evaluated regularly by Directors and Senior Management to ensure its continued effectiveness.
