

QUALITY

It is the Policy of Skar Precision Mouldings Ltd to provide a high quality, professional and efficient service to ensure the satisfaction of all our interested parties.

This Quality Policy will result in securing efficiency, a strong customer focus and the enhancement of long-term sustainability and profitability within the Company.

The Senior Management team will demonstrate leadership and commitment by establishing, implementing and maintaining the Business Management System (BMS) that integrates the requirements of:

ISO 9001:2015 Quality Management
ISO 13485:2016 Medical Devices
BRCGS Packaging Materials

We ensure that sufficient resources are made available and promote a culture of quality and product safety through communication, engagement, training and practical example.

Through direction and support, each employee will have a proper understanding of the importance of the BMS, their responsibility to contribute to its effectiveness and its direct relevance to the success of the Company.

Equally, every employee is responsible for and will be trained in the duties required by his or her specific role by receiving induction training, ongoing development and regular reviews to maintain competence and awareness.

We are committed to promoting continual improvement and setting quality objectives to produce safe, legally compliant products and address the risks and opportunities identified by Top Management.

Refer to Senior Management Commitment Product Safety & Quality Culture (Ref C92) for the plan, describing how the activities will be undertaken and reviewed.

The company will determine whether climate change is a relevant issue and address the needs of our interested parties in this respect.

The BMS is monitored, measured, evaluated and improved regularly under the Senior Management's responsibility, with regular reporting and communication of the status and effectiveness at all levels.

Signed: *K D Gant*
